

CoTrackPro + Guardians ad Litem & Child Advocates

Clearer child-centered facts, safer recommendations, and stronger protection from conflict spillover.

DESIGNED FOR GALS • CASA • CHILD REPRESENTATIVES • ADVOCACY TEAMS

What Families and Children Need Most From Advocates

“When the child’s world is clarified, adults make better choices.”

The Child's Lived Experience:

Represented accurately and safely, distinct from adult narratives.

Conflict Reduction:

Reduced exposure to manipulation and loyalty binds.

Verifiable Recommendations:

Clear guidance tied to verifiable patterns rather than loud assertions.

Service Alignment:

Coordination that keeps services aligned and avoids duplicated harm.

The CoTrackPro Closed-Loop Protection Engine

Standardizing Our Language for Coordination

Role

Who acts (GAL, CASA, Advocate, Parents, Providers, Court).

Trigger

An event creating child risk (e.g., threats, missed exchanges, intimidation, school distress).

Workstream

A repeatable pathway (Assessment → Plan → Monitoring → Review).

Artifact

A documented output (e.g., child-centered summary, service verification, safety plan).

Handoff

Transfer with clarity (Who, What, By When, How Verified).

The Advocate's Application Suite

Primary Tools (The Daily Drivers)

Decisions

Structured assessment pathways and child-centered optioning.

Legal

Organized timelines, exhibit lists, and order clarity to reduce noise.

Mental

Stabilization tools, support plan framing, and referral routing.

Secondary Support (As Needed)

Bridges

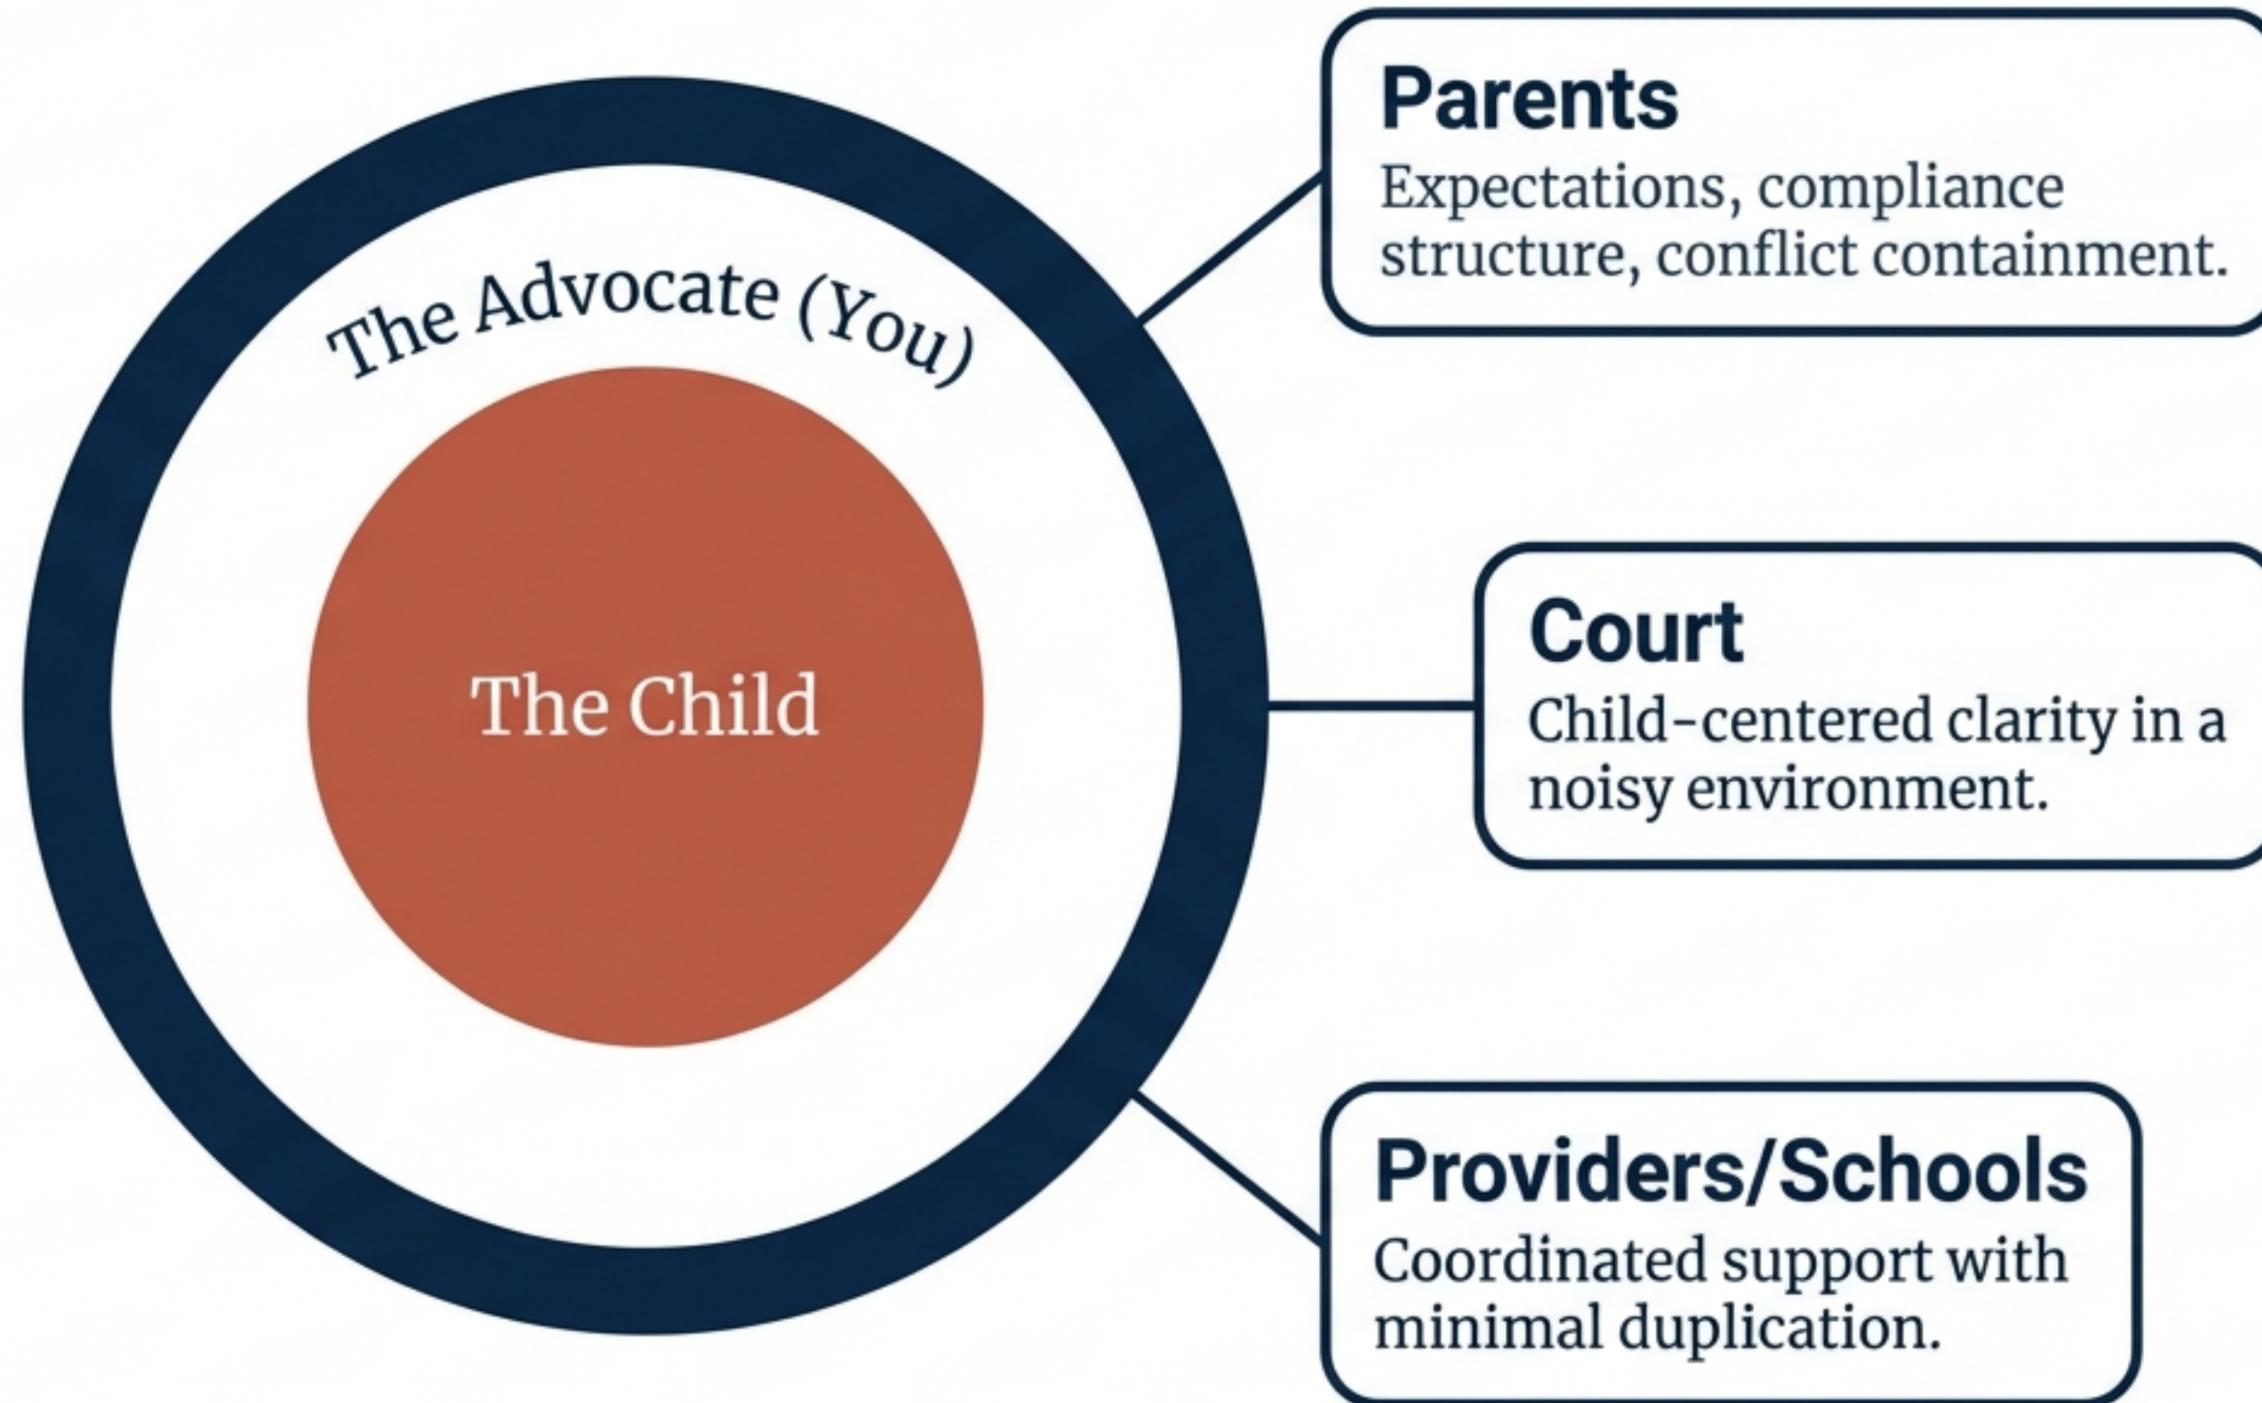

Respectful communication standards and scripts that reduce loyalty binds.

Cyber

Documentation hygiene for digital harassment or stalking.

The Ecosystem Map: You Are Here

Partner Roles

Judges/court staff

Therapists

Schools

Attorneys

Mediators/PCs

Public safety

The Advocate's Contribution to the Ecosystem

Child-Centered Clarity

Keeps the “child impact” front and measurable.

Risk Recognition

Identifies patterns that matter for safety/stability (filtering out mere conflict volume).

Coordination

Aligns providers, schools, and services toward one coherent plan.

Accountability

Ensures progress is measured through artifacts, not promises.

How the System Protects the Advocate

Core Workstreams for GALs and Advocates

1. Child Impact Assessment

Determining what the child is experiencing and needs.

2. Safety + Stability Planning

Establishing routines, transitions, and boundaries.

3. Service Coordination

Managing therapy, school supports, evaluations, and community resources.

4. Compliance Monitoring

Creating verification artifacts and progress checks.

5. Conflict Containment

Reducing loyalty binds and keeping the child out of the middle.

6. Court Reporting

Creating focused summaries tied to verifiable facts.

1. Child Impact Assessment

2. Safety + Stability Planning

3. Service Coordination

4. Compliance Monitoring

5. Conflict Containment

6. Court Reporting

Workstream Deep Dive: Safety & Stability Planning

The Triggers

- ⚠ Chaotic exchanges
- ⚠ Missed parenting time
- ⚠ Unsafe transitions
- ⚠ Child anxiety/withdrawal
- ⚠ Repeated boundary violations

The Artifacts

- 📄 Child-centered safety/stability plan
- 📄 Exchange protocol + verification rules
- 📄 Child exposure reduction plan
- 📄 Service referral map + expected proof

Apps Used: Decisions, Mental, Legal, Bridges

The Outcome

Predictable routines and reduced conflict exposure for the child.

Workstream Deep Dive: Compliance Monitoring

Proof Over Stories

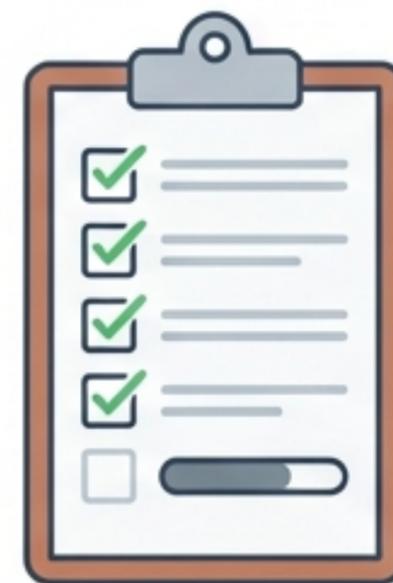

The Problem

Triggers: “They never follow through” cycles, parents claiming compliance without verification, repeated accusations without structure.

The Solution (Artifacts)

- Compliance log format (brief, dated, verifiable)
- Progress artifact expectations
- Service verification checklist
- Pattern summary updates

Apps: Legal, Decisions, Mental. Outcome: Accountability based on evidence, not narrative warfare.

The Trigger Library: First Best Actions

Trigger (If)	Action Path (Then)	Output (Artifact)
 Child distress at school	Stabilization + school support plan	 Student support artifact
 Exchange conflict	Exchange protocol + verification	 Protocol + compliance note
 Loyalty bind behaviors	Boundaries + communication rules	 Scripts + “no triangulation” plan
 Conflicting narratives	Timeline + source map	 Chronology + corroboration notes
 Safety concerns	Safety plan + escalation ladder	 Safety plan + referral routing
 Online harassment	Evidence hygiene + documentation	 Clean log + escalation path

The Artifact Toolkit

Child-Centered Docs

Child impact summary

Needs map

Routine stability plan

Protocols

Exchange protocol

Communication rules

School-event protocol

Monitoring

Compliance log
Service verification tracker

Progress artifact checklist

Court-Ready Summaries

Focused pattern summary

Citations to sources

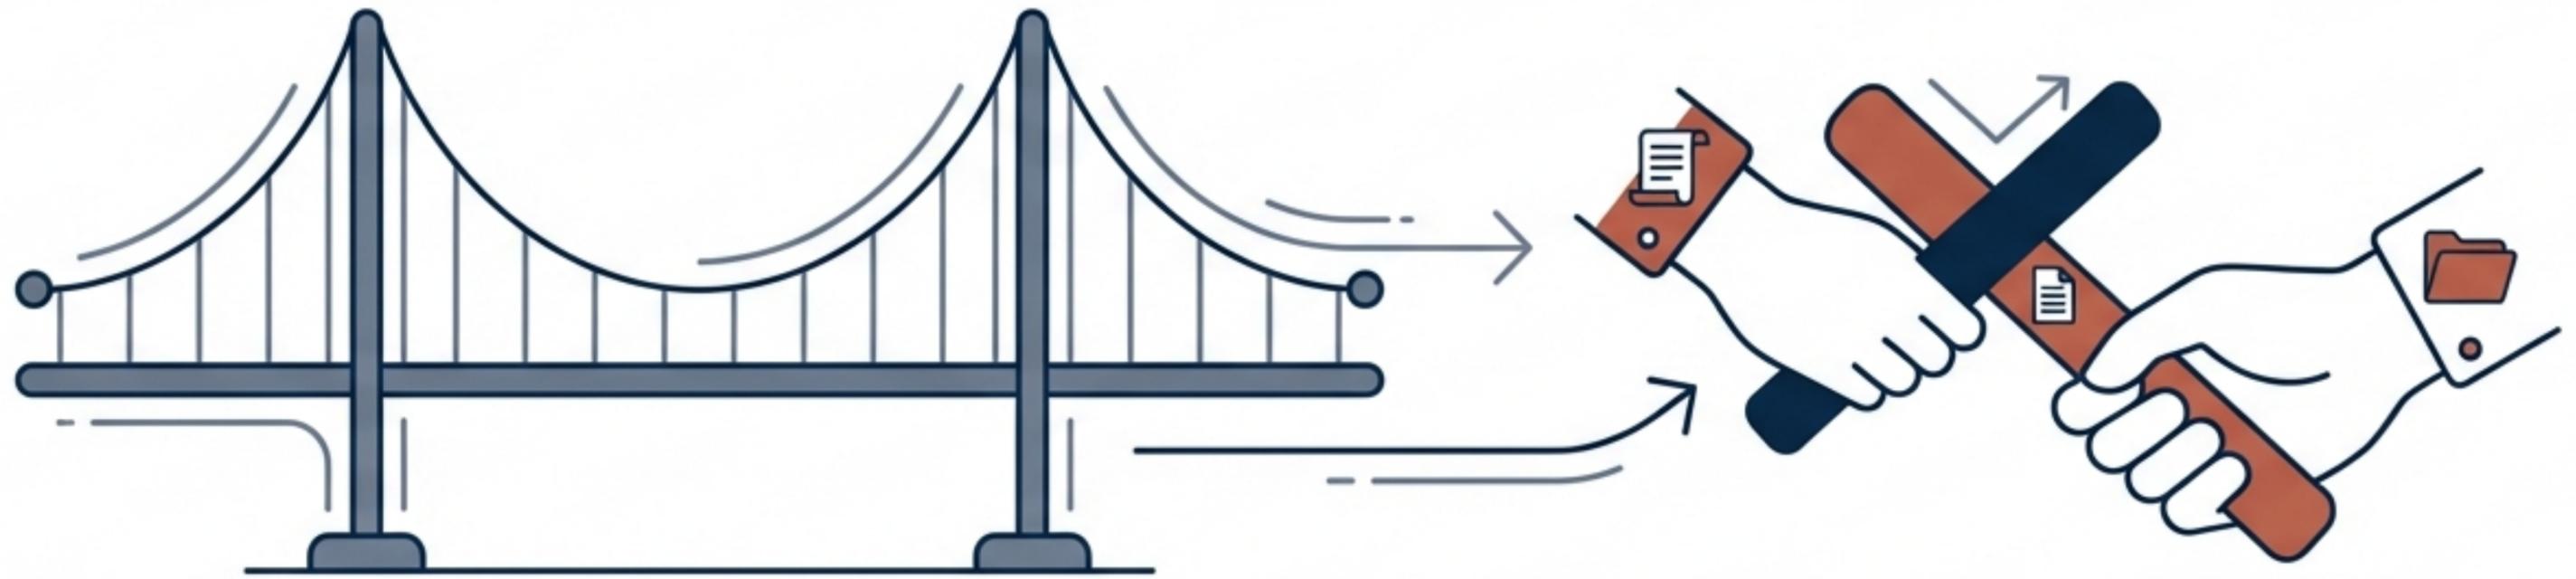

Family Tools

Scripts that reduce triangulation and intimidation

Goal: Prevent repeat conflict through measurable routines and standardized tracking.

Collaboration and Handoffs

The Golden Rule: No undocumented handoffs.

Handoff Components

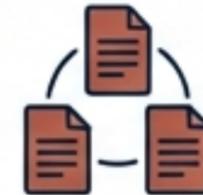

What the child needs + Who must do what + Deadlines + Verification method.

The "Ask Back"

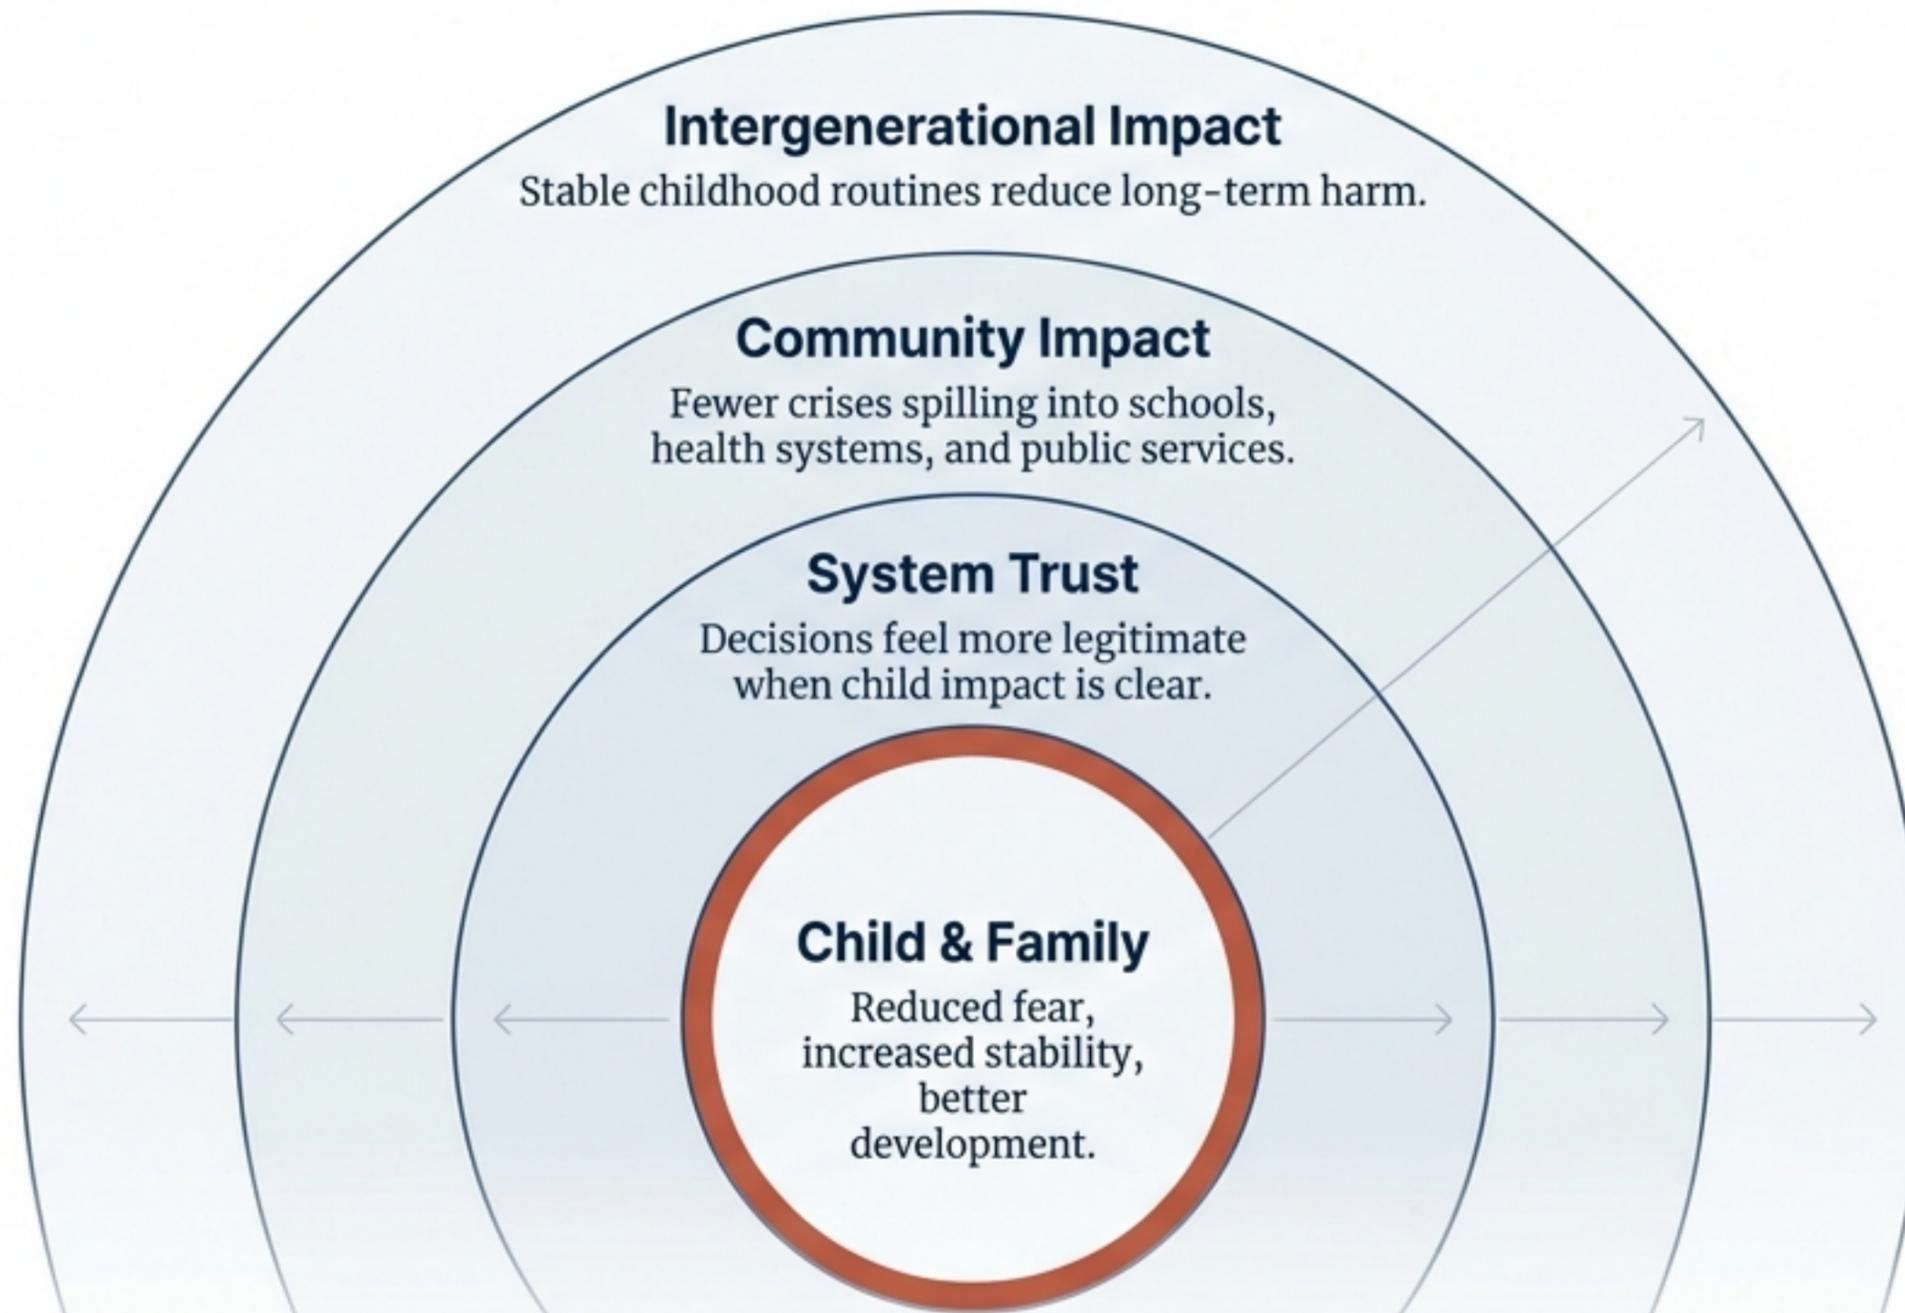

Require proof artifacts (attendance, completion, logs).

Alignment Standards

One plan, one language, one monitoring format. Minimal duplication. Clear expectations.

Community Impact: Closing the Loop

“When children are protected from conflict, families can heal—and communities stabilize.”
